Clear View Shot Design Technology
Minimizes the distraction of a structure typically located at the center of the backboard.

Lift Assist Technology
Heavy-duty actuator with dual assist springs makes for effortless height adjustment. Crank handle removes to prevent unauthorized adjustment.

Hoop Rejuvenator™ Kit

Is your basketball gooseneck system leaning, rusting, or non-regulation height? Is budget a concern? Upgrade your existing system with the Hoop Rejuvenator™ by Jaypro Sports. Replace rusted backboards or regain regulation heights without the added cost of excavating and replacing your system.

- Plumbs backboards on leaning goosenecks
- Allows for goal height adjustment after court resurfacing (up to 6” for H-frames and 5” for direct mount units)
- Designed to fit standard mount plates and gooseneck systems 4½” OD and up
- Acrylic, rectangular steel, and aluminum fan backboard options
- H-frame kit and direct mount kit models
- Breakaway goal (UBG-500F), stainless steel hardware, and zinc galvanizing spray to cover rust spots included

3½” OD goosenecks only use aluminum fan backboard (HRKIT-FA).

Gym Divider Curtains

Jaypro Sports offers a variety of functional and attractive divider curtains that help divide any sports facility or institutional space. From power-controlled to manual curtains, we custom design divider curtains for any facility size requirements. Also available in solid vinyl or vinyl coated mesh with several color options.

Fold Up Curtain FC-680
The most versatile and robust curtain in the industry. This curtain uses hoist cables which are weaved through grommets and are attached to the bottom batten. Hoist cables simply roll on the driveline, causing the curtain to fold neatly towards the ceiling in an accordion style fashion.
- Most durable, longest lasting curtain in the industry
- Easiest retractable curtain to install
- Compact fold to maximize clear height

Electric Curtain Winch CW-1800

Visit JAYPROSPECS.COM for product specifications

See page 106 for details
Slope Fold Curtain SC-685

Engineered to fit against the roof frame and conform to virtually any slope while providing maximum clearance for all sporting activities. This curtain can conform to virtually any roof to maximize clearance for all sporting events. Check out the new Field House Slope Fold Curtain (SC-685XL) on page 112.

Walk Draw Curtain WC-660 & WC-660BP

Designed for manual operation, this curtain is moved by pulling it along a ceiling suspended track to store along a perimeter wall.

Top Roll Curtain TC-701

Uses no hoist cables or straps to raise and lower the curtain and stores tighter than many other curtain designs for additional clearance with low ceilings. When operated, the entire fabric rolls onto the drive pipe.

Mini Top Roll Curtain TC-710

Compact curtain system designed to store tight to the ceiling structure by means of an internal tubular motor. Ideal for cafeterias, meeting rooms, stages, or other small spaces.

Roll Up Curtain RC-690

Raised and lowered by heavy-duty hoist belts and stores in a 2’ storage space close to the building structure. When operated, hoist belts roll the fabric onto the bottom batten.
Field House Slope Fold Curtain SC-685XL

Engineered to fit against the roof frame and conform to virtually any slope while providing maximum clearance for all sporting activities. This mega curtain utilizes dual synchronized winches with a low voltage controller. This curtain can conform to virtually any roof to maximize clearance for all sporting events. Pictured below, this SC-685XL curtain measures 190' long and 42' high at the peak and raises to the ceiling in 75 seconds.

Perimeter Fold Up Curtain FC-680P

Jaypro Perimeter Curtains are ideal for completely following the inside or outside perimeter of running tracks within multi-use facilities and field houses. These curtains are designed to separate the running track from interior basketball or volleyball courts, thereby maximizing facility use and flexibility. Adjoining curtains are overlapped and offset to allow for easy egress.
Motorized Netting

Safety netting systems are designed to protect spectators or create safe passageways outside the field of play. A complete surround netting system can be used to seal off a court or field for ball containment. Netting can enclose the perimeter of a facility as well as create a ceiling. Netting systems can be motorized or stationary. Contact Jaypro’s estimating department to help design a solution for your netting needs.

Visit JAYPROSPECS.COM for product specifications

Stationary Netting

Jaypro makes nets to separate outdoor athletic fields in large complexes and to divide indoor athletic facilities. We also provide complete perimeter and ceiling netting protection for your athletic facility. Our netting is found on tennis courts, basketball courts, soccer fields, and golf courses. Everything we make is customized to your needs as no two facilities are alike. Call or e-mail us to discuss your project.
