Seamless One Piece Lacrosse Net

The NETX1™ lacrosse net is the most robust and long-lasting net money can buy. Its one-piece design eliminates the most common points of failure on traditional lacrosse nets: the diagonal seams, while providing a modern aesthetic that truly sets it apart.

The UV/weather stabilized “double-needle” nylon twine has a true 7mm thickness (measured across the depth and width of the twine) with a minimum breaking strength of 770 lbs. The combination of high strength twine and lack of diagonal seams means it will outlast every other net on the market.

The included “body fit” rope adjusts the net on the goal to maintain an appropriate amount of slack so balls remain inside the goal without bouncing back out.

- Meets NCAA and NFHS regulations
- Weather-stabilized 7mm x 1½” sq. knotless nylon with breaking strength of 770 lbs.
- One piece design eliminates diagonal seams (the most common point of failure)

1 Year Limited Warranty

Custom FieldPro™ Net Systems

In today’s congested sports complexes with multi-use fields in close proximity to each other, keeping balls within the confines of the field is important. Stop wasting time chasing missed shots or errant passes during practice and games. Ensure safety of the athletes, coaches, and spectators alike on adjacent fields and tracks. FieldPro™ Net Systems by Jaypro Sports offer ultimate design flexibility to suit all perimeter netting needs.

Six Different Heights and Pole Styles

10' Straight Pole with multi-sport net is ideal for use as a Lacrosse and Field Hockey backstop net. The net is clipped at the top and bottom of each pole.

15', 20', 30', and 40' Straight Pole comes with a hoist system allowing quick and easy lowering/removal of the net after the game, season, or before a big storm. Reinstalling the net is a snap - all from ground level with no need for a ladder.

20' Offset Pole provides 3' of offset which is ideal for use around the perimeter of soccer and baseball/softball fields. It’s also an added measure of safety from ricocheting balls.

Basic Features and Recommendations

- Pole spacing should not exceed 20'
- Net systems should be set back at least 25’ from playing field
- Pulley system to raise/lower net (excludes 10’ poles)
- Ground sleeves and caps facilitate installation and allow for system removal
- Corrosion-resistant hardware included
- Specify preferred pole color when ordering
- Call for pricing and details

Jaypro Sports solves any netting problem. From indoor and outdoor requirements, to pole and structure support, we have the solution for your athletic field or facility.

FieldPro™ Ceiling Suspended Retractable Throwing Cage

Jaypro Sports offers a variety of discus, hammer throw, and shot put cage designs that allow throwing in/throwing out.

Nets can be mounted to a retractable frame or extend the full ceiling height. Net configuration may be straight or U-shaped to meet USTF, NCAA, and NFHS requirements.

Cage easily raises and lowers from ceiling via electric winch(s).
